README

Soy un readme

Crea un archivo readme.md como este
A brief description of what this project does and who it's for

Installation

Install my-project with npm

```
npm install my-project
cd my-project
```

Features

- Light/dark mode toggle
- Live previews
- Fullscreen mode
- Cross platform

Lessons Learned

What did you learn while building this project? What challenges did you face and how did you overcome them?

Optimizations

What optimizations did you make in your code? E.g. refactors, performance improvements, accessibility

🚀 About Me

I'm a full stack developer...

Roadmap

- Additional browser support
- Add more integrations

Screenshots

App Screenshot

Usage/Examples

```
import Component from 'my-project'

function App() {
  return <Component />
}
```

Used By

This project is used by the following companies:

- Company 1
- Company 2

Running Tests

To run tests, run the following command

```
npm run test
```

Badges

Add badges from somewhere like: shields.io

🛠 Skills

Javascript, HTML, CSS...

FAQ

Question 1

Answer 1

Question 2

Answer 2

Environment Variables

To run this project, you will need to add the following environment variables to your .env file

`API_KEY`

`ANOTHER_API_KEY`
